Apply by late February 2026

The University of Arizona

open-rank, tenure-track faculty position
starting August 2026

Join the Department of Hydrology and Atmospheric Sciences!

Faculty position in Radar Meteorology (broadly defined)

We seek areas of research and teaching that contribute to the advancement of process-level understanding of storm systems (e.g., mesoscale convective systems, monsoon convection, atmospheric rivers) and extreme weather, combining observations (particularly radar), modeling, and analysis. Areas of interest may include, but are not limited to: ground-based measurements using radars and other instruments, connection of these measurements to spaceborne measurements, kilometer-scale modeling of storm systems and extreme weather, and innovative use of AI/ML for observational data analysis and modeling.
